Abstracts

Touch sensors detect touch or the presence of close objects without relying on physical contact. Since, it does not have any moving parts like that of mechanical switch or potentiometer, it is more convenient and reliable to use. The growing demand for touch-enabled devices like smartphones and tablets coupled with the rising adoption of touch-enabled e-readers, interactive displays, and digital signage will aid in the growth of this market. Also, the widespread availability of low-cost smartphones in emerging markets, such as China and India, and the increasing number of end users accessing the Internet on smartphones and tablets will bolster the demand for touch-enabled smartphones and tablets during the forecast period. This increase in the demand for smartphones and tablets will, in turn, necessitate the utilization of touch sensors for the production of such devices; thus, resulting in market growth.

The global Touch Sensor market size was estimated at USD 6849.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 10.10% during the forecast period.
