### Report Overview

Towable RVs must be pulled (towed) with another vehicle and are available in two primary configurations.

The 5th wheel, is towed behind a truck and requires a special type of hitch that is mounted in the bed of the truck. You cannot tow a 5th wheel with a car. The 5th wheel is the largest towable RV.

A travel trailer, is also pulled behind a vehicle and connected by a hitch. You can use nearly any vehicle for towing travel trailers. Travel trailers have been around since the 1940s and are still popular today because they can be towed by an array of vehicles.

There are two other models of towable Unit and both are somewhat collapsible. One has the top and bottom portion designed so they can be cranked up or down. You end up with nearly a full-height trailer with solid walls. The other utilizes some type of canvas material for the wall. The canvas allows the unit to collapse (or crank/fold down). Both of these models can be found and are moderately popular.
