Abstracts

The market for toxicity testing outsourcing involves the provision of specialized services by third-party organizations to evaluate the adverse effects of chemical substances, pharmaceuticals, agrochemicals, consumer products, and industrial materials on human health and the environment. These services encompass a broad range of in vitro and in vivo studies, including acute, chronic, reproductive, and developmental toxicity tests, as well as ecotoxicological assessments and genotoxicity screenings, all conducted in compliance with stringent regulatory frameworks such as those mandated by the EPA, FDA, and OECD.
