The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on TPU Coated Fabrics competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, the global output of TPU Coated Fabrics is reach 50,500 tons, with an average selling price of US\$6/kg. TPU (Thermoplastic Polyurethane) coated fabric is a synthetic material with high elasticity and wear resistance. It is a thermoplastic polyurethane elastomer generated by the reaction of polyester or polyether with isocyanate, with good mechanical properties, chemical resistance and weather resistance. TPU coated fabric can be applied to various substrate surfaces to provide protection and beautification. The TPU-coated fabric market is undergoing a technology-driven upgrade. Improvements in environmental protection and recyclability are driving the trend toward "green coatings," with medical and outdoor applications becoming key breakthroughs. Regional competition is also reshaping, with the Asia-Pacific region (particularly China and India) rapidly emerging, while Europe and the United States continue to dominate the high-end market. Applications are becoming increasingly diverse, extending from traditional industrial protection to smart textiles, flexible electronics, and wearables, making TPU-coated fabrics an emerging material platform. At the same time, leading companies are accelerating supply chain integration, extending upstream and downstream to increase profits and market control. However, high production costs, pressure from environmental regulations, and volatile raw material prices remain key bottlenecks hindering industry development, particularly for small and medium-sized enterprises.

The global TPU Coated Fabrics market size was estimated at USD 303.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 4.00%

during the forecast period.
