The Track Busway System (Track-type distribution bus duct) is a system for power distribution, which is widely used in places such as data centers, industrial plants and high-rise buildings. Compared with traditional cable distribution methods, track-type bus duct has the advantages of large capacity, flexible installation and convenient maintenance. There are usually continuous openings at the bottom, allowing plug-in boxes to be added or moved at any position to meet the changing power demand. This design enables the track-type bus duct to respond quickly and adapt to layout or equipment adjustments in environments that require flexible power distribution.

The global Track Busway System market size was estimated at USD 1414.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 6.60% during the forecast period.
