Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Track Rod End competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, the global production of Steering Rod Ball End reached approximately 118 million units in 2024, with an average global market price of around US\$12 per unit. Steering Rod Ball End is a core component in the automotive steering mechanism, connecting the knuckle arm and the steering rocker arm. Its articulated structure between the ball joint and the ball seat enables multi-directional angle adjustment. It contains a ball pin and ball seat enclosed in a dustproof boot.
