## Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Trackless Tire-Mounted Mining Car competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, the global production of trackless wheeled mining trucks reached 193,000 units, with an average selling price of US\$8,050 per unit. The annual production capacity of a single trackless wheeled mining truck production line is approximately 20,000 units, with a gross profit margin of approximately 26.5%. Trackless wheeled mining trucks are a common type of mining transportation equipment, mainly used for material transport within mining areas, especially in locations requiring traversing hills, wetlands, or areas where laying tracks is inconvenient.
