Abstracts

Traffic enforcement cameras represent a technology-driven solution designed to monitor and enforce traffic regulations automatically through the use of imaging systems installed at intersections, roadways, and other strategic locations; these systems typically capture photographic or video evidence of violations such as speeding, red-light running, illegal turns, or bus lane infractions, and the collected data is then processed to issue citations or warnings to offending vehicle owners, thereby aiming to improve road safety, reduce accidents, and promote compliance with traffic laws without the constant need for physical law enforcement presence.
