Abstracts

Triacetoneamine, also known as 2,2,6,6-tetramethylpiperidine, is an important intermediate for hindered amine light stabilizers and pharmaceutical intermediates. Especially in the field of hindered amine light stabilizers, triacetone amine is the only parent nucleus of hindered amine light stabilizer pyridine derivatives and an important raw material for the synthesis of tetramethylpiperidine alcohol, tetramethylpiperidine amine, and polymerization inhibitor 702. Light stabilizers can prevent photo aging of polymer materials, greatly extending their service life and achieving significant results. At present, light stabilizers are essential additives in many polymer products under long-term outdoor or lighting effects, such as agricultural plastic films, military equipment, organic glass, lighting materials, building materials, light resistant coatings, medical plastics, bulletproof laminated glass, synthetic fibers, industrial packaging materials, rubber products, etc. With the gradual expansion of the application fields of polymer materials, light stabilizers are bound to further develop rapidly. Light stabilizers can improve the light resistance of polymer materials and extend their service life. Currently, hindered amine light stabilizers have become the most mainstream light stabilizer products. In recent years, the plastic, rubber, chemical fiber and other industries worldwide and in China have shown a good growth trend, becoming a strong driving force for the growth of demand for light stabilization. From the perspective of demand for light stabilizers, the global market for light stabilizers has been expanding year by year in recent years, with a compound growth rate of 3.65%. According to relevant research reports, In 2020, the global market size of light stabilizers (hindered amine light stabilizers, UV absorbers, quenchers) was approximately 1.195 billion US dollars. From 2021 to 2026, the global light stabilizer market will continue to grow rapidly, and it is expected that the global light stabilizer market size will reach 1.649 billion US dollars by 2026, with a compound annual growth rate of 5.6%.

The global Triacetoneamine for Light Stabilizer market size was estimated at USD 217.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 4.70% during the forecast period.
