Report Overview

Turn indicators, also known as directional signals or blinkers, are vehicle safety devices used to communicate a driver's intention to change lanes or make a turn. They consist of flashing lights located on the front, rear, and sometimes the side of a vehicle, emitting a rhythmic signal visible to other road users. These indicators are mandated by road safety regulations in most countries to enhance traffic predictability and reduce accidents. Modern turn indicators may incorporate LED technology for improved visibility and energy efficiency, with some advanced systems integrating adaptive lighting or automatic activation based on steering input.
