## Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Turquoise Bracelets competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. Turquoise bracelet is a kind of jewelry made of turquoise as the main material. It is usually worn on the wrist and has decorative, cultural, spiritual and other meanings and values. Turquoise is a hydrated copper aluminum phosphate mineral with a chemical composition of  $CuAl_2(PO_4)_2(OH)_2 \cdot 5H_2O$ , which has a unique chemical structure and physical properties. The colors are rich and varied, and the common ones are sky blue, blue-green, green, etc. The color is warm and often has white or black textures. These textures are called "iron wire", which makes each turquoise have a unique appearance.

The global Turquoise Bracelets market size was estimated at USD 391.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 5.70% during the forecast period.

This report offers a comprehensive and in-depth analysis of the global Turquoise Bracelets market, covering all critical facets from a broad macroeconomic overview to detailed micro-level insights. It examines market size, competitive landscape, emerging development trends, niche segments, key drivers and challenges, as well as conducts SWOT and value chain analyses.

The insights provided enable readers to understand the competitive dynamics within the industry and formulate effective strategies to enhance profitability and market positioning. Additionally, the report presents a clear framework for evaluating the current

status and future outlook of business organizations operating in this sector.

A significant focus of this report lies in the competitive landscape of the global Turquoise Bracelets market.
