Abstracts

Pillows designed for travel are usually travel-sized, meaning that they are small or that they can be compressed, folded, or broken down in some way so that they take up a minimum of space. A classic type of travel pillow is an airplane pillow, which provides support to the head and neck for people who want to sleep on planes. Many airplane pillows are c or u-shaped, ensuring that the head and neck are not contorted while someone attempts to sleep in an airplane seat. In 2022, the gradual relaxation of epidemic prevention and control measures around the world will have a positive impact on the rapid recovery of the tourism industry. According to data from the World Tourism Organization, the number of global travelers exceeded 900 million in 2022, a two-fold increase compared to 2021. In 2022, international tourism revenue returned to the US\$ 1 trillion, a real increase of 50% compared with 2021. According to data from the Ministry of Culture and Tourism of China, in 2022, the total number of domestic tourists was 2.53 billion, and the domestic tourism revenue (total tourism consumption) was 2 trillion.

The global U-shaped Pillow market size was estimated at USD 673.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 7.10% during the forecast period.
