Abstracts

In 2024, the global sales volume of UAV Autonomous Flight Systems reached approximately 35,000 sets, with an average market price of about USD 26,000. UAV Autonomous Flight Systems are integrated hardware and software solutions that enable unmanned aerial vehicles (UAVs) to perform flight missions with minimal or no human intervention. These systems combine onboard sensors (such as GPS, inertial measurement units, cameras, LiDAR, and radar) with advanced algorithms for navigation, path planning, obstacle avoidance, and mission execution. By processing real-time environmental and positional data, they allow UAVs to autonomously take off, follow pre-defined or dynamically generated flight routes, adapt to changing conditions, and safely return or land.

The global UAV Autonomous Flight Systems market size was estimated at USD 910.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 5.70% during the forecast period.
