Abstracts

UHMWPE webbing has super strong strength, but there is no sense of volume. UHMWPE has a strength 15 times that of steel and is one of the strongest fibers in the world. This type of webbing has excellent wear resistance. Due to its low density, it can float in water and has strong resistance to acids and alkalis. It also has a low to no tensile coefficient. Considering its strength, ultra-high molecular weight polyethylene is very thin, which makes it very easy to sew. The application range of UHMWPE webbing is very wide, including support straps, straps, seat belts, load-bearing applications, circular installation of sail angles, lifting rings, hanging ropes, public works, etc.

The global UHMWPE Webbing market size was estimated at USD 216.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 4.20% during the forecast period.
