Abstracts

An ultralight tent is a type of camping tent that is specifically designed to be lightweight and compact, making it ideal for backpacking or other outdoor activities where minimizing weight and pack size is important. These tents are typically made using lightweight materials such as nylon or polyester, and they often utilize innovative design features to reduce weight without compromising on functionality or durability. On average, ultralight tents typically weigh between 1 and 3 pounds (0.45 to 1.36 kilograms). However, there are even lighter options available that weigh less than a pound (0.45 kilograms). These extremely lightweight tents often have a minimalist design, using lightweight fabrics and materials, and may have limited features or reduced space compared to heavier tents. The core manufacturers of Ultralight Tent in the world include Zpacks, Big Agnes and Hyperlite. The top three companies have a market share of about 9%. North America is the world's largest Ultralight Tent market with a market share of about 45%, followed by Europe and Asia Pacific with a market share of 33% and 17%, respectively.
