T75 Cryogenic Tank Containers are suitable for the intermodal carriage of LIN (Nitrogen), LOX (Oxygen), LAr (Argon), CO₂ (Carbon dioxide), N₂O Nitrous Oxide, LNG (CH₄ Methane), C₂H₄ (Ethylene), C₂H₆ (Ethane). This report only covers the UN T75 ISO Tank Containers which are produced under the standard of ISO. The UN T75 ISO Tank Containers market refers to a specialized segment within the broader ISO tank container market, focusing on UN T75 ISO tank containers. These containers are specifically designed to transport hazardous chemicals, liquids, and gases that fall under UN (United Nations) regulations. The UN T75 designation refers to a specific standard for tanks used for transporting dangerous goods, particularly those that require high-pressure containment. As global demand for liquefied natural gas (LNG) and liquefied petroleum gas (LPG) increases, especially in regions like Asia, North America, and Europe, the need for UN T75 ISO Tank Containers grows. These containers are essential for the safe transport of these high-pressure gases. The chemical industry requires the safe transport of various hazardous chemicals, such as ammonia, chlorine, and other pressurized liquids. The UN T75 containers are designed specifically for these applications, driving demand in chemical transport. Governments around the world are increasingly implementing stricter environmental and safety regulations for the transport of hazardous materials. UN T75 ISO tank containers, designed to meet these regulations, become crucial for ensuring safe and legal transportation. With increasing trade volumes and the need for efficient intermodal transportation, the ability to move hazardous materials safely across multiple transport modes (road, rail, and sea) is a critical requirement. UN T75 containers fit this need perfectly, as they comply with international transport standards and can be easily transferred between different transport modes. Emerging economies, particularly in Asia Pacific and Africa, are seeing rapid industrialization and urbanization, leading to a rise in the demand for chemical products, LPG, and other gases. This is likely to boost the need for UN T75

ISO Tank Containers in these regions.

The global UN T75 ISO Tank Containers market size was estimated at USD 1035.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 4.00% during the forecast period.
