Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Uncooled Thermal Imaging Clip-On System competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, global sales of uncooled thermal imaging clip-on systems will be approximately 36,000 units, with an average unit price of approximately US\$3,500 per unit and an industry gross profit margin of approximately 28%-34%. This device is a "clip-on" night vision/target recognition module with an uncooled microradiometer (VOx microradiometer) as its core, installed in front of an optical sight to realize thermal imaging. Common general parameters include: detector resolution 384?288 or 640?480 pixels, NETD ?50?70 mK, frame rate 30 Hz, objective lens diameter 35?50 mm (with 1?4? optical/digital hybrid zoom), human detection range of approximately 800?1,800 m (depending on optical magnification and meteorological conditions), standard Picatinny quick-release interface, battery power supply (continuous operation of 4?8 hours), total weight of approximately 0.6?1.2 kg, environmental protection level is often IP67, and it meets MIL-STD shock and temperature cycling requirements. Upstream raw materials include micro-sensors (VOx) and detector modules, optical lenses and mechanical optical components, signal processing and electronic boards (FPGA/SoC, ADC, display driver), housings, quick-release mechanisms, and heat sinks, with materials accounting for 71% of the total cost. Downstream customers and integrators are primarily military, police, and defense optical manufacturers and system integrators. The overall market is driven by military night vision upgrades, continued border/law enforcement procurement, and the civilian hunting/security market, but is also affected by export controls and fluctuations in micro-sensor supply. Hensoldt has a mature product line of uncooled thermal clamps and portable thermal imaging subsystems, with an estimated annual production capacity of approximately 1,000 units for military, police, and OEMs.

The global Uncooled Thermal Imaging Clip-On System market size was estimated at USD 126.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 4.00% during the forecast period.
