The underwater cable burying robot is a working-level underwater robot and is an intelligent marine engineering equipment specially used for laying and burying submarine pipelines, cables and optical cables. It is equipped with a precise navigation and positioning system and a strong current resistance design to ensure the accuracy of operations in complex submarine terrain. The main market drivers include: Technological breakthroughs and domestic substitution: Key components such as hydraulic control systems and high-end lighting have achieved self-reliance, such as Shaoyang Hydraulics breaking the foreign monopoly. The formation of a domestic supply chain has driven the development of hundreds of parts and components supporting enterprises. Policy support and strategic needs: The national marine power strategy has promoted the establishment of marine science and technology innovation centers in local areas (such as Guangzhou Nansha). The "Deep Sea No. 1" Phase II project and the development of combustible ice in the South China Sea have accelerated the demand for equipment. Energy transformation and infrastructure investment: The growth of offshore wind power installed capacity has driven the demand for post-burying cable construction. Global submarine optical cable expansion plan, the annual compound growth rate of the transoceanic communication market is 29%. Environmental protection and efficiency requirements: Deep-sea resource development needs to reduce environmental damage and promote the development of precise burial technology. Automated equipment reduces labor costs and improves operational safety. Future Outlook With the iteration of technology and the growth of market demand, submarine cable burial robots will develop towards deeper waters (such as 6,000 meters) and higher intelligence (such as AI path planning). At the same time, the technological integration of sub-sectors such as bionic robots and deep-sea communications will further expand their application scenarios and help promote the sustainable development of the global marine economy.

The global Underwater Cable Laying Robot market size was estimated at USD 196.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 8.70% during the forecast period.
