Abstracts

Underwater cutting services are a comprehensive, high-tech operation conducted by professional divers or remotely operated vehicles (ROVs), utilizing specialized technologies and equipment to separate or dismantle structures such as metal and concrete in underwater environments. This service is widely used in core areas such as offshore platform dismantling, shipwreck salvage, underwater pipeline repair, bridge foundation renovation, and emergency rescue. Its successful implementation heavily relies on a professional engineering team, rigorous operational plans, and exceptional capabilities to handle complex underwater environments. It is a key technological link connecting above-water planning and underwater engineering implementation. Underwater cutting services, as a key supporting industry for marine engineering, rescue and salvage, and underwater facility maintenance, have a promising future. The global market is expected to maintain stable growth driven by demand from offshore oil and gas development and offshore wind power construction. Technological advancements are propelling the industry towards greater efficiency and safety. For example, advanced technologies such as underwater plasma cutting are increasingly widely used due to their high precision and minimal heat-affected zone. Simultaneously, the widespread adoption of automated and remotely operated vehicles (ROVs) is gradually improving operational capabilities and safety in deep water and complex environments. In the future, with the further release of demand in areas such as the decommissioning and upgrading of aging offshore facilities, underwater maintenance of nuclear power plants, and emergency rescue, underwater cutting services will continue to rely on technological innovation, exhibiting a development trend towards specialization, high precision, and comprehensive solutions.

The global Underwater Cutting Services market size was estimated at USD 366.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of
