Report Overview

Ethernet switches used in industrial settings are different from commercial switches. Industrial Ethernet switches are designed for environments that are unfavorable to commercial switches. This can include environments with extreme temperatures, high vibrations, and several electric noises. Commercial Ethernet switches are designed to meet enterprise electromagnetic compatibility (EMC) requirement. Most industrial switches are designed to meet stringent industrial EMC requirements. In addition, industrial Ethernet switches have a much higher mean time to failure and mean time to repair than commercial switches. Implementation of unmanaged Ethernet switch is governed in the applications of Ethernet devices communication with industrial PC or a network printer, this modulates uninterrupted communication between the devices.
