Abstracts

Urban Services is the extension of traditional residential and commercial property management expertise and technical capabilities to urban public space and infrastructure. This covers the maintenance and management of urban public facilities, the cleaning and renovation of environmental health, the maintenance and improvement of green landscape, the auxiliary management of traffic order, and the optimal provision of community public services. Through multiple service contents and innovative modes, we can help the city to enhance its image, improve residents' lives, enhance operational efficiency, promote sustainable urban development, and realize the transformation and upgrading from single property project management to urban integrated service operation.

The global Urban Services market size was estimated at USD 533890.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 2.30% during the forecast period.

This report offers a comprehensive and in-depth analysis of the global Urban Services market, covering all critical facets from a broad macroeconomic overview to detailed micro-level insights. It examines market size, competitive landscape, emerging development trends, niche segments, key drivers and challenges, as well as conducts SWOT and value chain analyses.

The insights provided enable readers to understand the competitive dynamics within the industry and formulate effective strategies to enhance profitability and market positioning. Additionally, the report presents a clear framework for evaluating the current status and future outlook of business organizations operating in this sector.
