Urological operating tables are specialized surgical tables designed to support a wide range of urological procedures, including cystoscopy, transurethral resection of the prostate (TURP), percutaneous nephrolithotomy (PCNL), and robotic-assisted surgeries such as prostatectomies. These tables feature advanced functionalities such as precise tilt and Trendelenburg positioning, radiolucent tabletops for intraoperative imaging, modular components for accessory attachment (e.g., leg holders and arm supports), and compatibility with fluoroscopy and other imaging systems to facilitate complex interventions involving the kidneys, bladder, ureters, and prostate.
