Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Ursodeoxycholic Acid competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. Ursodeoxycholic Acid is also known as ursodiol (USAN).

Ursodeoxycholic acid (3 β , 7 β -2-hydroxy-5 α -bile acid, UDCA) was first found in the bile of a black bear. Ursodeoxycholic Acid is an important clinical drug in the treatment of gallstones, cholecystitis, PBC, and PSC and has broad market prospects. In previous work, ursodeoxycholic acid was prepared by traditional organic synthesis. In this report, the Ursodeoxycholic Acid we mentioned is Ursodeoxycholic Acid API. In addition, the CAS number is 128-13-2. The growing prevalence of liver diseases, such as primary biliary cholangitis (PBC), primary sclerosing cholangitis (PSC), and certain forms of liver cirrhosis, serves as a significant driver for the Ursodeoxycholic Acid (UDCA) market. As more individuals are diagnosed with these conditions due to improved medical awareness and diagnostic techniques, the demand for effective treatments like UDCA increases. UDCA has demonstrated efficacy in managing and alleviating symptoms of these liver diseases, positioning it as a valuable therapeutic option. The rising global burden of liver disorders, often associated with factors like aging and lifestyle changes, provides a sustained demand for UDCA as a key component in manufacturing medications to address these conditions. One of the major challenges faced by the UDCA API market is the high cost of production, which can limit accessibility, especially in developing regions. The complex extraction and synthesis process of UDCA contributes to its expensive manufacturing, making it difficult for pharmaceutical companies to offer cost-effective treatments. Additionally, regulatory hurdles and stringent quality standards for drug approval add further pressure on manufacturers, which may slow down market growth. APAC is the largest consumption place, with a

consumption market share nearly 52% in 2023. Following APAC, Europe is the second largest consumption place with the consumption market share of 30%. Global key Ursodeoxycholic Acid players cover ICE, Dipharma Francis, Daewoong Chemical, Zhongshan Bailing, PharmaZell GmbH, Suzhou Tianlv, etc. In terms of revenue, the global five largest companies occupied for a share nearly 81% in 2024.

The global Ursodeoxycholic Acid market size was estimated at USD 583.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 8.70% during the forecast period.

This report offers a comprehensive and in-depth analysis of the global Ursodeoxycholic Acid market, covering all critical facets from a broad macroeconomic overview to detailed micro-level insights.
