Report Overview

Ursolic acid is a naturally occurring pentacyclic triterpenoid compound found in various plants, including apples, rosemary, basil, and other herbs, known for its potential health benefits such as anti-inflammatory, antioxidant, and anti-cancer properties. The market for ursolic acid is primarily driven by its applications in the pharmaceutical, nutraceutical, and cosmetic industries, where it is used in dietary supplements, skincare products, and as a potential therapeutic agent for metabolic and muscle-related disorders. Increasing consumer awareness of natural and plant-based ingredients, coupled with growing demand for functional foods and wellness products, has fueled market expansion. However, challenges such as limited bioavailability, high extraction costs, and regulatory hurdles in certain regions may restrain growth. Geographically, North America and Europe dominate the market due to strong demand for health supplements and advanced research in nutraceuticals, while Asia-Pacific is emerging as a high-growth region due to rising disposable incomes and expanding herbal medicine industries. The competitive landscape includes both established players and new entrants focusing on improving extraction techniques and developing novel formulations to enhance efficacy and market penetration. Future growth is expected to be supported by ongoing research into its therapeutic applications and increasing preference for natural bioactive compounds.

The global Ursolic Acid market size was estimated at USD 7.61 million in 2024 and is projected to grow at a compound annual growth rate (CAGR) of 4.28% during the forecast period.
