Abstracts

User-operations AI Customer Service Agents refers to AI customer service agents that are primarily designed to drive user lifecycle operations?activation, engagement, retention and monetization?rather than merely handling inbound support requests. These agents are tightly integrated with membership systems, CRMs, marketing automation tools and customer data platforms, leveraging behavioral data and profiles to automate segmentation and tagging, personalized offer and campaign recommendation, NPS/CSAT follow-ups, churn risk detection and win-back, as well as reactivation of dormant users across channels such as in-app messaging, chat, SMS, email and push notifications. Their main contribution lies in improving user activity, conversion and long-term retention while offloading repetitive audience management and outreach tasks from human growth/operations teams, making them a key subcategory of AI customer service where ?service? and ?user operations? are increasingly converged.

The global User-operations AI Customer Service Agents market size was estimated at USD 203.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 40.20% during the forecast period.

This report offers a comprehensive and in-depth analysis of the global User-operations AI Customer Service Agents market, covering all critical facets from a broad macroeconomic overview to detailed micro-level insights. It examines market size, competitive landscape, emerging development trends, niche segments, key drivers and challenges, as well as conducts SWOT and value chain analyses.

The insights provided enable readers to understand the competitive dynamics within the industry and formulate effective strategies to enhance profitability and market

positioning. Additionally, the report presents a clear framework for evaluating the current status and future outlook of business organizations operating in this sector.

A significant focus of this report lies in the competitive landscape of the global User-operations AI Customer Service Agents market. It offers detailed profiles of major players, including their market shares, performance metrics, product portfolios, and operational status. This enables stakeholders to identify leading competitors and gain a nuanced understanding of market rivalry and structure.

In summary, this report serves as an essential resource for industry participants, investors, researchers, consultants, and business strategists, as well as anyone planning to enter or expand their presence in the User-operations AI Customer Service Agents market.

Global User-operations AI Customer Service Agents Market: Market Segmentation Analysis

This research report provides a detailed segmentation of the market by region (country), key manufacturers, product type, and application. Market segmentation divides the overall market into distinct subsets based on factors such as product categories, end-user industries, geographic locations, and other relevant criteria.

A clear understanding of these market segments enables decision-makers to tailor their product development, sales, and marketing strategies more effectively to meet the unique needs of each segment. Leveraging market segmentation insights can significantly enhance targeted approaches, optimize resource allocation, and accelerate product innovation cycles by aligning offerings with the specific demands of diverse customer groups.
