The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on V-Wire Screen competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, global V-Wire Screen production reached approximately 228 K tons, with an average global market price of around US\$ 3,324.90 Price (US\$/ton). A steel wedge screen, also known as a wedge wire screen or profile wire screen, is a type of industrial filtration and separation component. It is constructed from a series of V-shaped or wedge-shaped stainless steel wires that are welded to support rods at specific intervals. The unique V-shaped profile of the wires creates a continuous slot opening, which is highly effective for filtering, sizing, and separating materials. This design provides a large open area, prevents clogging, and ensures strong structural integrity, making it suitable for a wide range of demanding applications in industries such as water treatment, mining, food and beverage processing, and petrochemicals.

The global V-Wire Screen market size was estimated at USD 757.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 9.60% during the forecast period.
