

# Global Vacuum Inert Gas Atomization (VIGA) Processing Technology Market Research Report 2024(Status and Outlook)

<https://marketpublishers.com/r/G69E242AD46FEN.html>

Date: June 2024

Pages: 137

Price: US\$ 3,200.00 (Single User License)

ID: G69E242AD46FEN

## Abstracts

### Report Overview:

Vacuum induction melting and inert gas atomization is the leading process for production of a variety of high-performance metal powders and essential for quality manufacturing of Ni-based super-alloys as well as Fe-, Co-, Cr-based and other special alloy powders. In the VIGA system, a vacuum induction melting unit is integrated with an inert gas atomization unit. The starting materials are melted using electromagnetic induction which couples electrical power into the crucible/material under vacuum or in an inert gas atmosphere. Once the desired melt homogeneity and chemical composition have been achieved, the material is poured into a tundish by crucible tilting. The fine metal stream flowing from the tundish orifice into the atomization nozzle system is subject to a high-pressure, inert-gas jet and then atomized. The combination of molten metal and gas jet creates a spray of micro-droplets that solidifies in the atomization tower and forms fine powder with spherical shape.

VIGA is where the melting and pouring of the alloy prior to atomisation is carried out in a vacuum chamber, to allow the production of the most oxidation-sensitive and reactive alloys, especially Fe-, Ni- and Co-based alloys containing Al, titanium and rare earths. This includes 'superalloys' such as IN718, maraging steels and M-Cr-Al-Y alloys. This technique was developed from the 1950s and 1960s when there was a push to explore the potential benefits of rapid solidification (RS) to allow the production of more highly alloyed superalloys for aerospace and defence applications. This proved to be a very challenging field of application but, after several decades of development, is now absorbing many thousands of tonnes per year of VIGA-produced superalloy powders. This intensive development has meant that the technology lends itself well to producing

powders for HIP, MIM and AM. Oxygen contents in the 50–200 ppm range are achievable. Particle shape is, again, spherical with mis-shapes. Particle sizes are as for IGA.

By 1940, air atomisation was a well-established process for the production of zinc, aluminium, and probably also copper/brass/bronze powders. During World War Two, German engineers applied it to pig iron for iron powder production using the RZ process (Roheisen Zunder-Verfahren or 'pig iron ignition process'). In the 1950s, W D Jones in the UK worked on inert gas atomisation as well as water atomisation and, by the 1960s, plants were being built for thermal spray alloy powder production of the NiCrBSi self-fluxing type. The development of Powder Metallurgy of high alloys and the concept of Rapid Solidification (RS) for refinement of microstructures led to the construction in Sweden of inert gas atomisers for tool steels, which went commercial on a 1–2 t scale in the 1970s. At the same time, the US government invested heavily in R&D on RS superalloys for aerospace and the first Vacuum Inert Gas Atomiser (VIGA) units were constructed with 100–300 kg capacity.

Since then, the use of inert gas atomisation (IGA) with air melting, as well as VIGA, has become widespread in use for thermal spray powders, PM superalloys, AM powders, and MIM powders. VIGA production of superalloy powders in the US alone now amounts to something in the order of 10–20 kt/year.

Inert gas atomisation is the method of choice for more demanding applications, such as MIM, AM, HIP, HVOF, brazing pastes, etc. Nitrogen is the most economic option, but argon is also used on reactive alloys like superalloys and titanium. Helium is used mostly in the production of aluminium and magnesium powders, but there is currently a huge incentive to switch to argon due to the unstable supply and high cost of helium. Total installed capacity of IGA and VIGA probably approaches 100 kt/ year, with large numbers of plants in different countries and industries. They range from tiny plants for a few kgs of precious metal brazing alloy to 3 t/h continuous plants for tool steel production. The fact that they are mostly processing relatively valuable metals and alloys (high value-added, large margin applications) makes small, local, plants economically feasible as opposed to iron powder plants, where low cost and economy of scale is imperative.

The Global Vacuum Inert Gas Atomization (VIGA) Processing Technology Market Size was estimated at USD 78.16 million in 2023 and is projected to reach USD 171.56 million by 2029, exhibiting a CAGR of 14.00% during the forecast period.

This report provides a deep insight into the global Vacuum Inert Gas Atomization (VIGA) Processing Technology market covering all its essential aspects. This ranges from a macro overview of the market to micro details of the market size, competitive landscape, development trend, niche market, key market drivers and challenges, SWOT analysis, Porter's five forces analysis, value chain analysis, etc.

The analysis helps the reader to shape the competition within the industries and strategies for the competitive environment to enhance the potential profit. Furthermore, it provides a simple framework for evaluating and accessing the position of the business organization. The report structure also focuses on the competitive landscape of the Global Vacuum Inert Gas Atomization (VIGA) Processing Technology Market, this report introduces in detail the market share, market performance, product situation, operation situation, etc. of the main players, which helps the readers in the industry to identify the main competitors and deeply understand the competition pattern of the market.

In a word, this report is a must-read for industry players, investors, researchers, consultants, business strategists, and all those who have any kind of stake or are planning to foray into the Vacuum Inert Gas Atomization (VIGA) Processing Technology market in any manner.

### Global Vacuum Inert Gas Atomization (VIGA) Processing Technology Market: Market Segmentation Analysis

The research report includes specific segments by region (country), manufacturers, Type, and Application. Market segmentation creates subsets of a market based on product type, end-user or application, Geographic, and other factors. By understanding the market segments, the decision-maker can leverage this targeting in the product, sales, and marketing strategies. Market segments can power your product development cycles by informing how you create product offerings for different segments.

## Contents

### **1 RESEARCH METHODOLOGY AND STATISTICAL SCOPE**

#### 1.1 Market Definition and Statistical Scope of Vacuum Inert Gas Atomization (VIGA)

Processing Technology

#### 1.2 Key Market Segments

1.2.1 Vacuum Inert Gas Atomization (VIGA) Processing Technology Segment by Type

1.2.2 Vacuum Inert Gas Atomization (VIGA) Processing Technology Segment by

Application

#### 1.3 Methodology & Sources of Information

1.3.1 Research Methodology

1.3.2 Research Process

1.3.3 Market Breakdown and Data Triangulation

1.3.4 Base Year

1.3.5 Report Assumptions & Caveats

### **2 VACUUM INERT GAS ATOMIZATION (VIGA) PROCESSING TECHNOLOGY MARKET OVERVIEW**

#### 2.1 Global Market Overview

2.1.1 Global Vacuum Inert Gas Atomization (VIGA) Processing Technology Market Size (M USD) Estimates and Forecasts (2019-2030)

2.1.2 Global Vacuum Inert Gas Atomization (VIGA) Processing Technology Sales Estimates and Forecasts (2019-2030)

#### 2.2 Market Segment Executive Summary

#### 2.3 Global Market Size by Region

### **3 VACUUM INERT GAS ATOMIZATION (VIGA) PROCESSING TECHNOLOGY MARKET COMPETITIVE LANDSCAPE**

3.1 Global Vacuum Inert Gas Atomization (VIGA) Processing Technology Sales by Manufacturers (2019-2024)

3.2 Global Vacuum Inert Gas Atomization (VIGA) Processing Technology Revenue Market Share by Manufacturers (2019-2024)

3.3 Vacuum Inert Gas Atomization (VIGA) Processing Technology Market Share by Company Type (Tier 1, Tier 2, and Tier 3)

3.4 Global Vacuum Inert Gas Atomization (VIGA) Processing Technology Average Price by Manufacturers (2019-2024)

3.5 Manufacturers Vacuum Inert Gas Atomization (VIGA) Processing Technology Sales Sites, Area Served, Product Type

3.6 Vacuum Inert Gas Atomization (VIGA) Processing Technology Market Competitive Situation and Trends

3.6.1 Vacuum Inert Gas Atomization (VIGA) Processing Technology Market Concentration Rate

3.6.2 Global 5 and 10 Largest Vacuum Inert Gas Atomization (VIGA) Processing Technology Players Market Share by Revenue

3.6.3 Mergers & Acquisitions, Expansion

## **4 VACUUM INERT GAS ATOMIZATION (VIGA) PROCESSING TECHNOLOGY INDUSTRY CHAIN ANALYSIS**

4.1 Vacuum Inert Gas Atomization (VIGA) Processing Technology Industry Chain Analysis

4.2 Market Overview of Key Raw Materials

4.3 Midstream Market Analysis

4.4 Downstream Customer Analysis

## **5 THE DEVELOPMENT AND DYNAMICS OF VACUUM INERT GAS ATOMIZATION (VIGA) PROCESSING TECHNOLOGY MARKET**

5.1 Key Development Trends

5.2 Driving Factors

5.3 Market Challenges

5.4 Market Restraints

5.5 Industry News

5.5.1 New Product Developments

5.5.2 Mergers & Acquisitions

5.5.3 Expansions

5.5.4 Collaboration/Supply Contracts

5.6 Industry Policies

## **6 VACUUM INERT GAS ATOMIZATION (VIGA) PROCESSING TECHNOLOGY MARKET SEGMENTATION BY TYPE**

6.1 Evaluation Matrix of Segment Market Development Potential (Type)

6.2 Global Vacuum Inert Gas Atomization (VIGA) Processing Technology Sales Market Share by Type (2019-2024)

6.3 Global Vacuum Inert Gas Atomization (VIGA) Processing Technology Market Size Market Share by Type (2019-2024)

6.4 Global Vacuum Inert Gas Atomization (VIGA) Processing Technology Price by Type (2019-2024)

## **7 VACUUM INERT GAS ATOMIZATION (VIGA) PROCESSING TECHNOLOGY MARKET SEGMENTATION BY APPLICATION**

7.1 Evaluation Matrix of Segment Market Development Potential (Application)

7.2 Global Vacuum Inert Gas Atomization (VIGA) Processing Technology Market Sales by Application (2019-2024)

7.3 Global Vacuum Inert Gas Atomization (VIGA) Processing Technology Market Size (M USD) by Application (2019-2024)

7.4 Global Vacuum Inert Gas Atomization (VIGA) Processing Technology Sales Growth Rate by Application (2019-2024)

## **8 VACUUM INERT GAS ATOMIZATION (VIGA) PROCESSING TECHNOLOGY MARKET SEGMENTATION BY REGION**

8.1 Global Vacuum Inert Gas Atomization (VIGA) Processing Technology Sales by Region

8.1.1 Global Vacuum Inert Gas Atomization (VIGA) Processing Technology Sales by Region

8.1.2 Global Vacuum Inert Gas Atomization (VIGA) Processing Technology Sales Market Share by Region

8.2 North America

8.2.1 North America Vacuum Inert Gas Atomization (VIGA) Processing Technology Sales by Country

8.2.2 U.S.

8.2.3 Canada

8.2.4 Mexico

8.3 Europe

8.3.1 Europe Vacuum Inert Gas Atomization (VIGA) Processing Technology Sales by Country

8.3.2 Germany

8.3.3 France

8.3.4 U.K.

8.3.5 Italy

8.3.6 Russia

## 8.4 Asia Pacific

### 8.4.1 Asia Pacific Vacuum Inert Gas Atomization (VIGA) Processing Technology Sales by Region

#### 8.4.2 China

#### 8.4.3 Japan

#### 8.4.4 South Korea

#### 8.4.5 India

#### 8.4.6 Southeast Asia

## 8.5 South America

### 8.5.1 South America Vacuum Inert Gas Atomization (VIGA) Processing Technology Sales by Country

#### 8.5.2 Brazil

#### 8.5.3 Argentina

#### 8.5.4 Columbia

## 8.6 Middle East and Africa

### 8.6.1 Middle East and Africa Vacuum Inert Gas Atomization (VIGA) Processing Technology Sales by Region

#### 8.6.2 Saudi Arabia

#### 8.6.3 UAE

#### 8.6.4 Egypt

#### 8.6.5 Nigeria

#### 8.6.6 South Africa

## 9 KEY COMPANIES PROFILE

### 9.1 ALD

#### 9.1.1 ALD Vacuum Inert Gas Atomization (VIGA) Processing Technology Basic Information

#### 9.1.2 ALD Vacuum Inert Gas Atomization (VIGA) Processing Technology Product Overview

#### 9.1.3 ALD Vacuum Inert Gas Atomization (VIGA) Processing Technology Product Market Performance

#### 9.1.4 ALD Business Overview

#### 9.1.5 ALD Vacuum Inert Gas Atomization (VIGA) Processing Technology SWOT Analysis

#### 9.1.6 ALD Recent Developments

### 9.2 Consarc

#### 9.2.1 Consarc Vacuum Inert Gas Atomization (VIGA) Processing Technology Basic Information

- 9.2.2 Consarc Vacuum Inert Gas Atomization (VIGA) Processing Technology Product Overview
- 9.2.3 Consarc Vacuum Inert Gas Atomization (VIGA) Processing Technology Product Market Performance
- 9.2.4 Consarc Business Overview
- 9.2.5 Consarc Vacuum Inert Gas Atomization (VIGA) Processing Technology SWOT Analysis
- 9.2.6 Consarc Recent Developments
- 9.3 PSI
  - 9.3.1 PSI Vacuum Inert Gas Atomization (VIGA) Processing Technology Basic Information
  - 9.3.2 PSI Vacuum Inert Gas Atomization (VIGA) Processing Technology Product Overview
  - 9.3.3 PSI Vacuum Inert Gas Atomization (VIGA) Processing Technology Product Market Performance
  - 9.3.4 PSI Vacuum Inert Gas Atomization (VIGA) Processing Technology SWOT Analysis
  - 9.3.5 PSI Business Overview
  - 9.3.6 PSI Recent Developments
- 9.4 SMS Group
  - 9.4.1 SMS Group Vacuum Inert Gas Atomization (VIGA) Processing Technology Basic Information
  - 9.4.2 SMS Group Vacuum Inert Gas Atomization (VIGA) Processing Technology Product Overview
  - 9.4.3 SMS Group Vacuum Inert Gas Atomization (VIGA) Processing Technology Product Market Performance
  - 9.4.4 SMS Group Business Overview
  - 9.4.5 SMS Group Recent Developments
- 9.5 Arcast
  - 9.5.1 Arcast Vacuum Inert Gas Atomization (VIGA) Processing Technology Basic Information
  - 9.5.2 Arcast Vacuum Inert Gas Atomization (VIGA) Processing Technology Product Overview
  - 9.5.3 Arcast Vacuum Inert Gas Atomization (VIGA) Processing Technology Product Market Performance
  - 9.5.4 Arcast Business Overview
  - 9.5.5 Arcast Recent Developments
- 9.6 Topcast
  - 9.6.1 Topcast Vacuum Inert Gas Atomization (VIGA) Processing Technology Basic

## Information

9.6.2 Topcast Vacuum Inert Gas Atomization (VIGA) Processing Technology Product Overview

9.6.3 Topcast Vacuum Inert Gas Atomization (VIGA) Processing Technology Product Market Performance

9.6.4 Topcast Business Overview

9.6.5 Topcast Recent Developments

## 9.7 Avimetal

9.7.1 Avimetal Vacuum Inert Gas Atomization (VIGA) Processing Technology Basic Information

9.7.2 Avimetal Vacuum Inert Gas Atomization (VIGA) Processing Technology Product Overview

9.7.3 Avimetal Vacuum Inert Gas Atomization (VIGA) Processing Technology Product Market Performance

9.7.4 Avimetal Business Overview

9.7.5 Avimetal Recent Developments

## 9.8 VMP

9.8.1 VMP Vacuum Inert Gas Atomization (VIGA) Processing Technology Basic Information

9.8.2 VMP Vacuum Inert Gas Atomization (VIGA) Processing Technology Product Overview

9.8.3 VMP Vacuum Inert Gas Atomization (VIGA) Processing Technology Product Market Performance

9.8.4 VMP Business Overview

9.8.5 VMP Recent Developments

## 9.9 ACME

9.9.1 ACME Vacuum Inert Gas Atomization (VIGA) Processing Technology Basic Information

9.9.2 ACME Vacuum Inert Gas Atomization (VIGA) Processing Technology Product Overview

9.9.3 ACME Vacuum Inert Gas Atomization (VIGA) Processing Technology Product Market Performance

9.9.4 ACME Business Overview

9.9.5 ACME Recent Developments

## 9.10 Zhuzhou ShuangLing

9.10.1 Zhuzhou ShuangLing Vacuum Inert Gas Atomization (VIGA) Processing Technology Basic Information

9.10.2 Zhuzhou ShuangLing Vacuum Inert Gas Atomization (VIGA) Processing Technology Product Overview

9.10.3 Zhuzhou ShuangLing Vacuum Inert Gas Atomization (VIGA) Processing Technology Product Market Performance

9.10.4 Zhuzhou ShuangLing Business Overview

9.10.5 Zhuzhou ShuangLing Recent Developments

9.11 Hunan Skyline

9.11.1 Hunan Skyline Vacuum Inert Gas Atomization (VIGA) Processing Technology Basic Information

9.11.2 Hunan Skyline Vacuum Inert Gas Atomization (VIGA) Processing Technology Product Overview

9.11.3 Hunan Skyline Vacuum Inert Gas Atomization (VIGA) Processing Technology Product Market Performance

9.11.4 Hunan Skyline Business Overview

9.11.5 Hunan Skyline Recent Developments

9.12 Zhuzhou Hanhe

9.12.1 Zhuzhou Hanhe Vacuum Inert Gas Atomization (VIGA) Processing Technology Basic Information

9.12.2 Zhuzhou Hanhe Vacuum Inert Gas Atomization (VIGA) Processing Technology Product Overview

9.12.3 Zhuzhou Hanhe Vacuum Inert Gas Atomization (VIGA) Processing Technology Product Market Performance

9.12.4 Zhuzhou Hanhe Business Overview

9.12.5 Zhuzhou Hanhe Recent Developments

## **10 VACUUM INERT GAS ATOMIZATION (VIGA) PROCESSING TECHNOLOGY MARKET FORECAST BY REGION**

10.1 Global Vacuum Inert Gas Atomization (VIGA) Processing Technology Market Size Forecast

10.2 Global Vacuum Inert Gas Atomization (VIGA) Processing Technology Market Forecast by Region

10.2.1 North America Market Size Forecast by Country

10.2.2 Europe Vacuum Inert Gas Atomization (VIGA) Processing Technology Market Size Forecast by Country

10.2.3 Asia Pacific Vacuum Inert Gas Atomization (VIGA) Processing Technology Market Size Forecast by Region

10.2.4 South America Vacuum Inert Gas Atomization (VIGA) Processing Technology Market Size Forecast by Country

10.2.5 Middle East and Africa Forecasted Consumption of Vacuum Inert Gas Atomization (VIGA) Processing Technology by Country

## **11 FORECAST MARKET BY TYPE AND BY APPLICATION (2025-2030)**

11.1 Global Vacuum Inert Gas Atomization (VIGA) Processing Technology Market Forecast by Type (2025-2030)

11.1.1 Global Forecasted Sales of Vacuum Inert Gas Atomization (VIGA) Processing Technology by Type (2025-2030)

11.1.2 Global Vacuum Inert Gas Atomization (VIGA) Processing Technology Market Size Forecast by Type (2025-2030)

11.1.3 Global Forecasted Price of Vacuum Inert Gas Atomization (VIGA) Processing Technology by Type (2025-2030)

11.2 Global Vacuum Inert Gas Atomization (VIGA) Processing Technology Market Forecast by Application (2025-2030)

11.2.1 Global Vacuum Inert Gas Atomization (VIGA) Processing Technology Sales (Kilotons) Forecast by Application

11.2.2 Global Vacuum Inert Gas Atomization (VIGA) Processing Technology Market Size (M USD) Forecast by Application (2025-2030)

## **12 CONCLUSION AND KEY FINDINGS**

## I would like to order

Product name: Global Vacuum Inert Gas Atomization (VIGA) Processing Technology Market Research Report 2024(Status and Outlook)

Product link: <https://marketpublishers.com/r/G69E242AD46FEN.html>

Price: US\$ 3,200.00 (Single User License / Electronic Delivery)

If you want to order Corporate License or Hard Copy, please, contact our Customer Service:

[info@marketpublishers.com](mailto:info@marketpublishers.com)

## Payment

To pay by Credit Card (Visa, MasterCard, American Express, PayPal), please, click button on product page <https://marketpublishers.com/r/G69E242AD46FEN.html>

To pay by Wire Transfer, please, fill in your contact details in the form below:

First name:  
Last name:  
Email:  
Company:  
Address:  
City:  
Zip code:  
Country:  
Tel:  
Fax:  
Your message:
