Abstracts

Variable life insurance is a type of permanent life insurance that combines a death benefit with an investment component, allowing policyholders to allocate a portion of their premiums into various sub-accounts?such as stocks, bonds, or mutual funds?which can fluctuate in value based on market performance, thereby offering the potential for cash value growth while also exposing the policy to investment risk, as the policy's cash value and death benefit may increase or decrease depending on the performance of the chosen investments.

The global Variable Life Insurance market size was estimated at USD 12750.0 million in 2024 and is projected to grow at a compound annual growth rate (CAGR) of 4.50% during the forecast period.
