Abstracts

VCI Bags is an innovative high-tech product based on the combination of polymer materials and VCI gas phase rust prevention technology development. It integrates vapor phase corrosion inhibitors (VCI) into the bag material. These corrosion inhibitors continue to volatilize under a certain relative humidity to form anti-rust gas molecules. These molecules are adsorbed on the metal surface to form a protective film only a few molecules thick, thereby preventing corrosive media such as oxygen and moisture from contacting the metal, achieving the purpose of rust prevention?.
