Abstracts

Vehicle Isofix anchorage refers to a standardized system of attachment points integrated into a vehicle's structure, designed to securely fasten compatible child safety seats without relying on the vehicle's seat belts. This system consists of two rigid metal anchor points located between the seatback and seat cushion, along with a top tether or support leg to minimize forward rotation in the event of a collision. By providing a direct, rigid connection between the child seat and the vehicle chassis, Isofix enhances installation ease, reduces misuse, and improves overall safety performance, aligning with global regulatory standards such as ECE R44 and UN R129 (i-Size).

The global Vehicle Isofix Anchorage market size was estimated at USD 1850.0 million in 2024 and is projected to grow at a compound annual growth rate (CAGR) of 4.65% during the forecast period.
