Abstracts

Ventilation nasal strips are adhesive external devices worn across the bridge of the nose, designed to mechanically lift and open nasal passages by gently pulling on the outer skin, thereby improving airflow and reducing nasal resistance during breathing. Primarily used to alleviate snoring, mild sleep apnea, congestion from colds or allergies, and to enhance athletic performance by facilitating better oxygen intake, these over-the-counter products rely on a flexible spring-like mechanism embedded in medical-grade adhesive material to provide non-pharmacological relief without invasive procedures or systemic side effects.
