## Abstracts

The Vertical Take-off and Landing (VTOL) Hybrid UAV for Reconnaissance is an aerial vehicle that combines the efficient cruise capability of a fixed-wing UAV with the VTOL functionality of a rotorcraft UAV. Specifically designed for surveying and reconnaissance missions, it employs special designs and technologies, such as tiltable rotors or a combination of multi-rotors and fixed wings, to switch between vertical takeoff and landing and horizontal flight. This allows it to take off and land without the need for a runway. Simultaneously, by leveraging the aerodynamic efficiency of its fixed wings during cruise, it can rapidly cover large areas while carrying surveying and reconnaissance equipment to acquire high-resolution geographic information, target intelligence, and other data.

The global Vertical Take-Off and Landing (VTOL) Hybrid UAVs for Reconnaissance market size was estimated at USD 873.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 8.20% during the forecast period.
