Report Overview

Very low frequency or VLF is the ITU designation for radio frequencies (RF) in the range of 3-30 kHz, corresponding to wavelengths from 100-10 km, respectively. The band is also known as the myriameter band or myriameter wave as the wavelengths range from one to ten myriameters (an obsolete metric unit equal to 10 kilometers).

High power transmitting antennas for VLF frequencies are very large wire antennas, up to a mile across. They consist of a series of steel radio masts, linked at the top with a network of cables, often shaped like an umbrella or clotheslines.
