Abstracts

Video compression platforms are online tools or software that help users reduce the size of video files while maintaining their visual quality as much as possible by using various video encoding and compression algorithms. The platform usually supports multiple video formats (such as MP4, AVI, MOV, etc.) and different compression modes (such as lossy compression and lossless compression), aiming to optimize video files, reduce storage space usage, and increase upload, download and transmission speeds, especially in bandwidth-constrained environments. Video compression platforms are widely used in scenarios such as video sharing, social media, live broadcast platforms, online video courses, and corporate video storage and management, helping users improve efficiency and save costs without sacrificing video quality.
