## Abstracts

Video conferencing is a technology that allows people to communicate and collaborate remotely through audio and video. It is a useful tool for businesses and organizations to conduct meetings, presentations and training courses without the need for full face-to-face meetings. Due to the high cost of traditional video conferencing, purchasing a whole system not only requires high costs, but also leads to the problem of idle resources, and video conferencing leasing is an effective way to solve this problem. Video conferencing equipment leasing is indeed a very flexible and practical solution, especially in occasions where high-quality remote communication is required. Whether it is a short-term event or long-term use, leasing can provide a cost-effective option. The video conferencing rental market has developed rapidly in recent years, benefiting from the increase in demand for remote work and online communication. Especially during the epidemic, the demand for video conferencing solutions from enterprises and educational institutions has increased significantly, driving the expansion of the market. At present, the market competition is fierce, and various technologies are constantly updated, such as high-definition picture quality, virtual backgrounds, and interactive functions, providing users with more choices. In the future, with the popularization of 5G technology and the development of artificial intelligence, the video conferencing rental market will pay more attention to user experience and is expected to develop towards a more flexible and convenient service model. At the same time, cross-industry integration and customized solutions will also become an important trend in the market.

The global Video Conferencing Rentals market size was estimated at USD 436.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 6.10% during the forecast period.

This report offers a comprehensive and in-depth analysis of the global Video

Conferencing Rentals market, covering all critical facets from a broad macroeconomic overview to detailed micro-level insights. It examines market size, competitive landscape, emerging development trends, niche segments, key drivers and challenges, as well as conducts SWOT and value chain analyses.

The insights provided enable readers to understand the competitive dynamics within the industry and formulate effective strategies to enhance profitability and market positioning. Additionally, the report presents a clear framework for evaluating the current status and future outlook of business organizations operating in this sector.

A significant focus of this report lies in the competitive landscape of the global Video Conferencing Rentals market. It offers detailed profiles of major players, including their market shares, performance metrics, product portfolios, and operational status. This enables stakeholders to identify leading competitors and gain a nuanced understanding of market rivalry and structure.

In summary, this report serves as an essential resource for industry participants, investors, researchers, consultants, and business strategists, as well as anyone planning to enter or expand their presence in the Video Conferencing Rentals market.

### **Global Video Conferencing Rentals Market: Market Segmentation Analysis**

This research report provides a detailed segmentation of the market by region (country), key manufacturers, product type, and application. Market segmentation divides the overall market into distinct subsets based on factors such as product categories, end-user industries, geographic locations, and other relevant criteria.

A clear understanding of these market segments enables decision-makers to tailor their product development, sales, and marketing strategies more effectively to meet the unique needs of each segment. Leveraging market segmentation insights can significantly enhance targeted approaches, optimize resource allocation, and accelerate product innovation cycles by aligning offerings with the specific demands of diverse customer groups.
