## Abstracts

A Video Conferencing Room (or VC Room) is a dedicated physical space specifically equipped and optimized for conducting high-quality virtual meetings and collaborations with remote participants. Unlike traditional meeting rooms, a VC Room features specialized audiovisual (AV) infrastructure, including professional-grade displays, dedicated video conferencing endpoints (often all-in-one or modular systems), advanced cameras, and sophisticated audio setups (such as ceiling or table microphone arrays) designed to ensure clear communication. The environment is often acoustically treated and configured with appropriate lighting to deliver an equitable experience for both in-room and remote attendees. These rooms range from small "huddle spaces" to large boardrooms and are essential for hybrid work models, serving as the physical hub where in-person teams connect with the global workforce.
