Report Overview

It is made by polymerizing three ingredients at one time; ternary block copolymers can be synthesized by living polymerization by adding monomers one by one, or by homopolymer coupling method; ternary graft copolymers are mostly in binary. It is synthesized by graft polymerization of the third monomer on the regular copolymer chain. Adding the third monomer can improve some properties of the binary copolymer. For example, copolymerization of three monomers, acrylonitrile, butadiene and styrene, can produce ABS resin with excellent performance.
