## Abstracts

Viral Vector CDMO Services refers to contract development and manufacturing organizations (CDMOs) that provide custom production and development services for viral vectors. Viral vectors are a commonly used gene therapy tool that deliver target genes into human cells to treat disease. Viral Vector CDMO Services provides various types of viral vector production services, including adenovirus vectors, AAV vectors, and LV vectors. CDMO companies usually provide a full range of viral vector production and development services from the research stage to commercial production, including quality control, preparation, analysis, packaging and storage services. These services help accelerate the development and commercialization of gene therapy drugs and advance the field of gene therapy. CDMO companies can also help customers develop production plans that suit their product needs, and provide customized technical support and solutions based on customer needs. Customers can choose the appropriate CDMO company as a partner based on their needs to ensure the high-quality production and successful launch of their gene therapy products. The viral vector CDMO services market has emerged as a critical enabler of the rapidly growing gene therapy and advanced biologics sector, driven by the increasing demand for specialized production capabilities and accelerated time-to-market for innovative therapies. The market is characterized by high technological barriers, requiring expertise in viral vector design, process development, cGMP-compliant manufacturing, and quality assurance. Companies in this space are leveraging advanced bioprocessing technologies, automation, and artificial intelligence tools to improve yield, consistency, and scalability while maintaining regulatory compliance. Strategic partnerships between biotechnology firms and CDMOs are becoming increasingly common, allowing developers to outsource complex manufacturing tasks and focus on clinical development and commercialization. Overall, the market is marked by intense competition among specialized service providers, rapid technological innovation, and growing adoption of

viral vector-based therapies across diverse therapeutic areas, positioning CDMOs as indispensable partners in the biopharmaceutical value chain.
