When talking about virtual instruments, we usually mean software instruments. They are software programs that emulate the sound and characteristics of real musical instruments and are played using a computer. The global entertainment and media industry will be worth \$2.32 trillion in 2022, up 5.4% from 2021. It is expected that the growth rate of the entertainment media industry will continue to slow down in the next five years, and the average annual growth rate is expected to be 3.6%. The forecast growth rate for 2026-2027 is 2.8 percent, even lower than the International Monetary Fund's forecast of 3.1 percent economic growth.
