Abstracts

Vitamin based eyelash serums are cosmetic products formulated with vitamins and other active ingredients designed to promote eyelash growth, enhance thickness, and improve overall lash health. These serums typically include key components such as biotin (to strengthen lashes and prevent breakage), panthenol (to moisturize and condition), and vitamins like E and C (to nourish hair follicles and protect against environmental damage), often combined with peptides or botanical extracts to stimulate growth cycles. Applied directly to the lash line, these products aim to deliver targeted nutrition to hair follicles, encouraging longer, fuller, and healthier-looking lashes over consistent use, and are positioned as a safer, more natural alternative to prescription options or eyelash extensions.

The global Vitamin Based Eyelash Serum market size was estimated at USD 325.4 million in 2024 and is projected to grow at a compound annual growth rate (CAGR) of 6.85% during the forecast period.
