Report Overview

Wafer level chip scale packaging (WLCSP) is a wafer level chip packaging method, which is different from the traditional chip packaging method (cutting first and then sealing and testing, and at least 20% of the volume of the original chip is increased after packaging) , this latest technology is to package and test the whole wafer before cutting it into IC particles. Therefore, the volume after packaging is equal to the original size of IC bare crystal.

The global Wafer Level Chip Scale Packaging Technology market size was estimated at USD 4850.25 million in 2024 and is projected to grow at a compound annual growth rate (CAGR) of 7.85% during the forecast period.
