Report Overview

Wall-mounted urinals are plumbing fixtures designed for male urination, typically installed in public, commercial, or residential restrooms to optimize space and hygiene. These fixtures are mounted directly to the wall, eliminating the need for a floor base, which simplifies cleaning and reduces maintenance costs. They are commonly made from durable materials like vitreous china, stainless steel, or porcelain-coated steel to withstand high-traffic usage and frequent sanitation. Wall-mounted urinals are favored in settings such as airports, stadiums, offices, and restaurants due to their space efficiency, water-saving capabilities (especially in waterless or low-flow models), and compliance with accessibility standards. The market is driven by urbanization, infrastructure development, and increasing hygiene awareness, with innovations focusing on water conservation, touchless flushing technology, and antimicrobial surfaces to meet evolving consumer and regulatory demands.

The global Wall Mounted Urinal market size was estimated at USD 1214.78 million in 2024 and is projected to grow at a compound annual growth rate (CAGR) of 4.25% during the forecast period.
