Abstracts

Wallet as a Service (WaaS) refers to a cloud-based solution that provides businesses with the infrastructure and tools to create, manage, and deploy digital wallets without having to build the technology from scratch. This service typically includes functionalities for secure storage, transaction processing, user authentication, and compliance with regulatory standards. WaaS allows companies to integrate digital wallet capabilities into their platforms, enabling them to offer features such as mobile payments, digital asset management, and loyalty programs efficiently. By leveraging WaaS, businesses can focus on their core operations while outsourcing the complexities of wallet infrastructure to specialized providers. The Wallet as a Service (WaaS) market is experiencing significant growth, driven by the increasing demand for digital payment solutions and the rising adoption of cryptocurrencies.
