This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Watch-Type Heart Rate Monitors competitive dynamics, regional economic interdependencies, and supply chain reconfigurations.Watch-Type Heart Rate Monitors are smart wearable devices worn on the wrist. They use built-in optical sensors (or some high-end models with electrode sensors) to monitor, record and analyze the user's heart rate in real time. This type of device can not only track resting heart rate and exercise heart rate on a daily basis, but also use algorithms to evaluate sleep quality, stress level and physical condition. Some products have abnormal heart rate warning or medical-grade electrocardiogram (ECG) functions, providing users with convenient health insights and exercise guidance.The watch-type heart rate monitors market is experiencing rapid growth, driven mainly by the surge in demand for health monitoring and the popularity of wearable technology. With the increasing health awareness of consumers and the emphasis on chronic disease management in an aging society, wrist-type devices that combine convenience and continuous monitoring functions have become a hot spot in the market. This type of product combines medical-grade heart rate monitoring technology with consumer electronics attributes, not only meeting daily fitness tracking needs, but also gradually penetrating into the field of cardiovascular disease prevention. Technological advances (such as optimization of photoplethysmography PPG technology and improved algorithm accuracy) have promoted product performance upgrades, while competition between technology giants such as Apple, Huawei, and Xiaomi and traditional medical device manufacturers has accelerated functional innovation and price reduction. However, the market still faces challenges such as data accuracy certification, medical compliance thresholds, and user privacy protection. In the future, products that integrate multi-parameter health monitoring (such as blood oxygen, blood pressure), artificial
