Water - based decorative inks are a type of ink formulated with water as the primary solvent or carrier. These inks are designed for use in decorative applications, such as on various surfaces like paper, cardboard, textiles, and plastics. They contain pigments or dyes that provide color, along with other additives to enhance properties like adhesion, durability, and printability. Water - based decorative inks offer several advantages, including low volatility, reduced odor, and better environmental compatibility compared to traditional solvent - based inks. They dry relatively quickly, can be easily washed off printing equipment with water, and are suitable for a wide range of printing techniques, such as screen printing, inkjet printing, and flexographic printing.
