Water based paint remover refers to chemical stripping agents formulated primarily with water as the solvent, designed to soften, lift, and dissolve various types of paint, varnish, and coatings from surfaces without relying on harsh, volatile organic compounds (VOCs) or chlorinated solvents. These products are engineered to be environmentally friendly, low in toxicity, and biodegradable, making them suitable for both indoor and outdoor use with reduced health risks and minimal odor. They typically work through alkaline or bio-based active ingredients that break down paint polymers, allowing for easier scraping or rinsing, and are often preferred in residential, commercial, and industrial applications where regulatory compliance, user safety, and sustainability are prioritized.
