## Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Water-Cooled Intercoolers competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, global Water-Cooled Intercoolers production reached approximately 3.43 million units, with an average global market price of around US\$ 410 per unit. The Water-Cooled Intercoolers are heat exchangers that reduce the temperature of turbocharged air using a liquid coolant.
