### Report Overview:

Water swellable yarn, also known as water blocking yarn, is a type of yarn that swells when it comes into contact with water. This swelling action can be used to create a watertight seal, which can be useful in a variety of applications.

Water swellable yarn is typically made from a synthetic material, such as polyacrylonitrile (PAN) or aramid. These materials are able to absorb a large amount of water, which causes them to swell.
