Abstracts

Waterproof coating emulsion is a specialized aqueous polymer dispersion designed to form a continuous, impermeable film on surfaces such as concrete, masonry, wood, and roofing materials, effectively preventing water ingress while allowing vapor transmission to minimize trapped moisture. These emulsions typically incorporate acrylic, silicone, or polyurethane-based polymers, along with additives like fillers, defoamers, and biocides to enhance durability, adhesion, and resistance to environmental degradation. The product functions by coalescing upon drying, creating a flexible, elastomeric barrier that withstands structural movement and weathering, making it suitable for both interior and exterior applications in construction, infrastructure, and industrial maintenance.

The global Waterproof Coating Emulsion market size was estimated at USD 1450.0 million in 2024 and is projected to grow at a compound annual growth rate (CAGR) of 5.50% during the forecast period.
