Abstracts

Web-based taxi sharing, also known as ride-pooling or shared mobility, refers to digital platforms that connect multiple passengers traveling along similar routes to share a single vehicle, dynamically matching riders in real-time to optimize routes and reduce individual fares; these services leverage GPS, algorithmic dispatching, and mobile applications to facilitate cost-efficient, on-demand transportation while addressing urban congestion and environmental concerns through increased vehicle occupancy rates.

The global Web Based Taxi Sharing market size was estimated at USD 24500.0 million in 2024 and is projected to grow at a compound annual growth rate (CAGR) of 12.50% during the forecast period.

This report offers a comprehensive and in-depth analysis of the global Web Based Taxi Sharing market, covering all critical facets from a broad macroeconomic overview to detailed micro-level insights. It examines market size, competitive landscape, emerging development trends, niche segments, key drivers and challenges, as well as conducts SWOT and value chain analyses.

The insights provided enable readers to understand the competitive dynamics within the industry and formulate effective strategies to enhance profitability and market positioning. Additionally, the report presents a clear framework for evaluating the current status and future outlook of business organizations operating in this sector.

A significant focus of this report lies in the competitive landscape of the global Web Based Taxi Sharing market. It offers detailed profiles of major players, including their market shares, performance metrics, product portfolios, and operational status. This enables stakeholders to identify leading competitors and gain a nuanced understanding
